Minimum Viable Product (MVP)

Project-Seed Team LaForge

- ***What we have now***

- Basic log in and register page
- Main page
 - Search function
 - Product preview gallery
- Customer Page
 - Purchase function
 - Product introduction
- Supplier Page
 - Stock Page

- ***1st Release***

- Some brief information and guidance about our site pops up on the landing page
- Some filters and key elements under the search function
- Add category labels such as growing season, color, crop use, etc. above the preview images of various crops on the main page
- Add shopping cart function similar to mainstream shopping website in customer page
-

- ***2nd Release***

- Add the market price comparison function of the same crop in the customer page

- Provide purchase records and other data on the customer page
- Add external popular science links similar to wikipedia and other official websites for planting

-

- **3rd Release**

- Return options for consumers
- When the transaction is completed, the buyer and seller can score and evaluate the for each other
- Establish a buyer and seller reputation system for others to check
- The Supplier Page provides input assistance, such as scan-thing and agent service requests, to users who are not familiar with computer operations.
